

Module *Fondamentaux d'architecture logicielle* Architectures Applicatives

Jour 1 - 10/04/2025

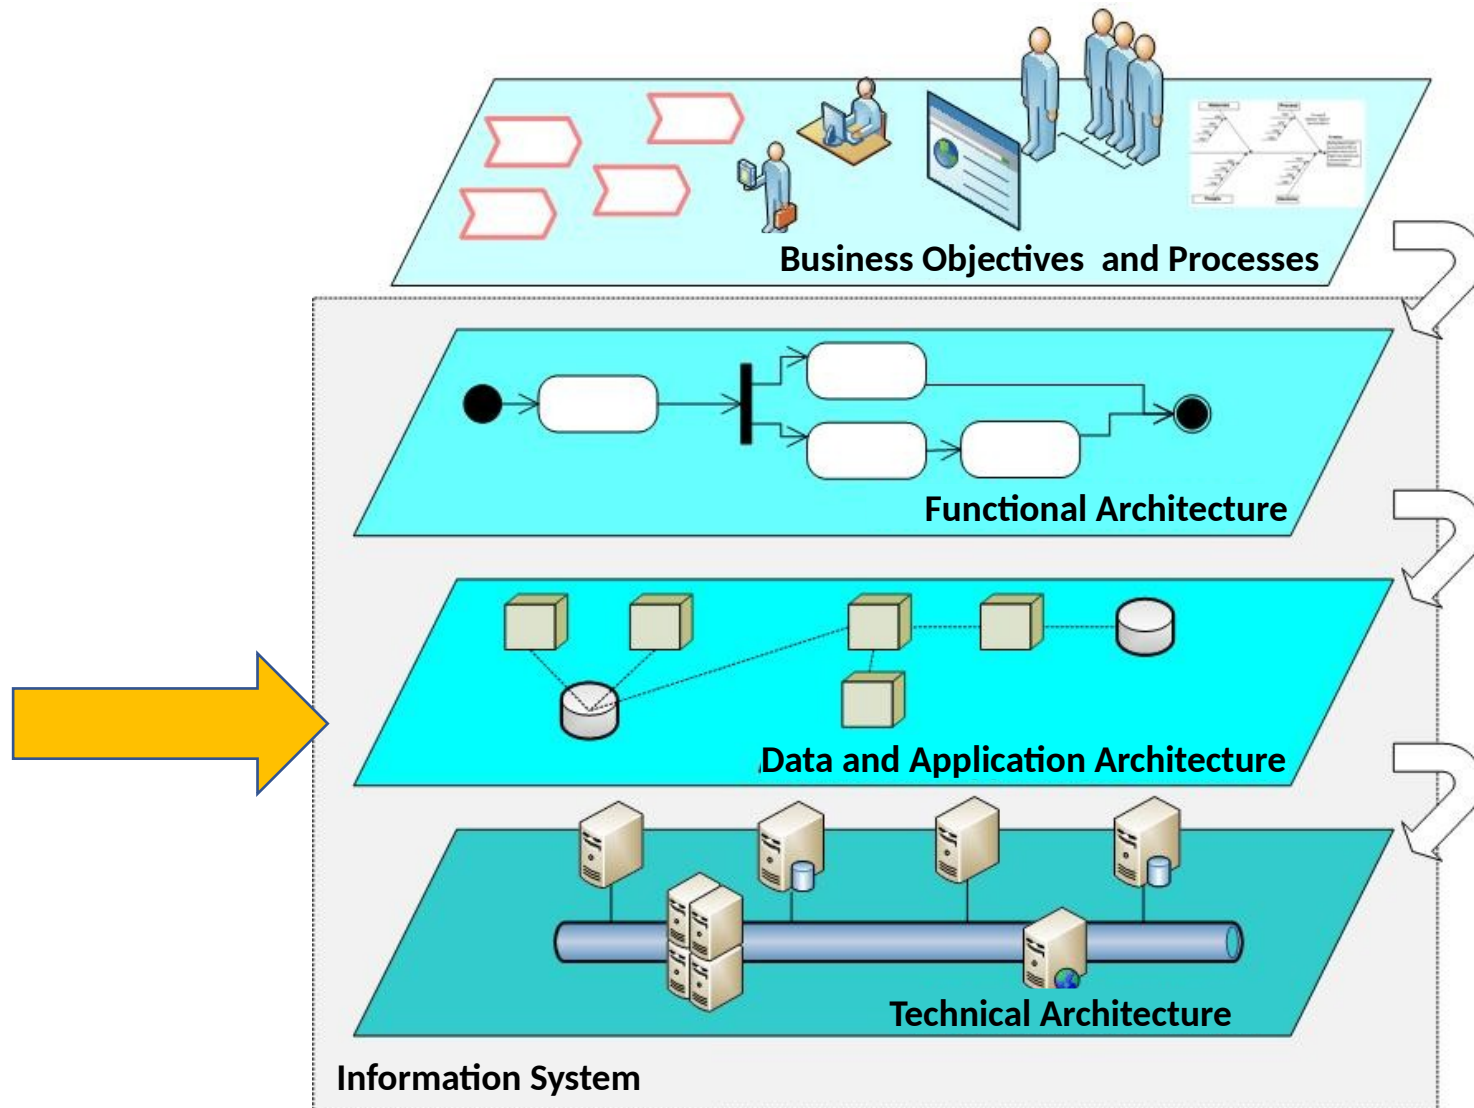

Architecture

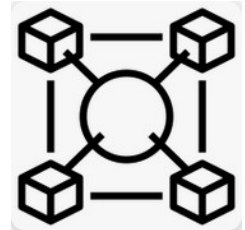

- Design or structure of a software system
- Assembly of communicating software blocks to provide a set of services

Application Architecture in the Information System

Key Traits Expected in Application Architecture

Key Traits Expected in Application Architecture

Robustness

Availability

Security

Performance

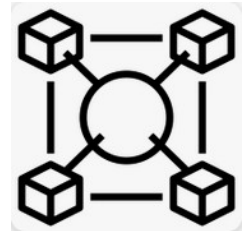

Scalability

Reliability

Functionality

Interoperability

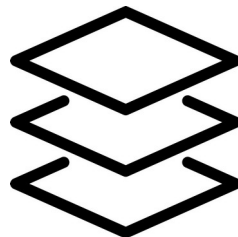

Usability

Simplicity

Maintainability

Extensibility

Adaptability

Evolvability

Objectif de la journée

- Dresser un panorama des différentes familles d'architectures applicatives
- Sensibilisation à la problématique de la transition
- Fondamentaux qui seront complétés par d'autres cours, dont
 - jour 2 - tendances et évolutions : SOA, *services patterns at the cloud era*
 - intégration applicative

Programme de la journée

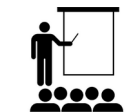

- Couches, tiers et middleware : du monolithe aux microservices

- Éléments architecturaux pour le passage à l'échelle et la tolérance aux pannes

- Études de cas : focus sur les transitions

- Cas des architectures Web et Mobile
